Initial Risk Reaction

Highest

Aggressive

Appropriate for investors who have both a high tolerance for risk and a long investment time horizon. The main objective of this portfolio is to provide high growth for the investor's assets. Portfolios in this range may have substantial fluctuations in value from year to year, making this category unsuitable for those who do not have an extended investment horizon.

Adventurous

Appropriate for investors with a relatively high tolerance for risk and a longer time horizon. These investors seek above-average growth from their investable assets. The main objective of this risk range is capital appreciation, and its investors should be able to tolerate moderate fluctuations in their portfolio values.

Balanced

Appropriate for investors who seek relatively stable growth from their investable assets. An investor in the balanced risk range will have a higher tolerance for risk and/or a longer time horizon than either the cautious or defensive investors. The main objective of an individual within this range is to achieve steady portfolio growth while limiting fluctuations to less than those of the overall stock markets.

Conservative

Appropriate for the investor who seeks modest capital appreciation from their portfolio. This investor will have either a moderate time horizon or a slightly higher risk tolerance than the most defensive investor. While this range is still designed to preserve the investor's capital, fluctuations in the values of portfolios may occur from year to year.

Defensive

Appropriate for the defensive investor, one with a low risk tolerance and/or a short time horizon. It is targeted towards the investor seeking investment stability and liquidity from their investable assets. The main objective of the individual in this risk range is to preserve capital. Fluctuations in the values of portfolios within this range are minor.

options that are more stable.

	move your money into a more stable investment?
	A. £5,000 or less.
	B. £10,000
	C. £15,000
	D. £20,000
	E. It is unlikely I will move my money even if my investment falls in value.
12	How does your concern about losing money manifest itself in relation to your investment?
	A. I would sell my investments.
	B. I would be worried but not uncomfortable enough to sell my investments immediately. If my investments suffered losses over several months, I would probably sell.
	C. I would wait a full year before making changes to my investments—short-term losses in the value of my investments do not bother me.
	D. I would not make changes—I understand that investments can have occasional negative yearly returns However, I have a higher chance of reaching my investment goals if I stick with my investment over the long term.
13	Which of the following best describes your view on investing?
	A. My investments don't have to grow, I just want my money to be safe.
	B. I can accept lower growth for greater certainty.
	C. I am more concerned about the possible losses than the possible gains.
	D. I can accept possible losses for long- term investment growth.
	E. To achieve high levels of growth, it is necessary to take risk.

The value of investments varies from year to year.

Suppose you invested £100,000. How much money would you need to lose before you wanted to

Investment Style

Risk Scoring

To calculate the risk score of the investor their investment Attitude to Risk and Time Frame scores will need to be factored together. Questions 1, 2 & 3 are not scored. These are intended to allow advisers to record this information within a single document and place the results in context. Furthermore, if the response to Question 2 indicates that the investor cannot tolerate a fall in the value of their money and therefore has no capacity for loss, the RTO result will be that there is no suitable investment solution - the tables below provides the scoring for each answer.

Time Frame Score

Question	А	В	С	D	E	Score
4	0	6	10	15	20	
5	0	2	5	7	10	
6	10	7	5	2	0	
Total						

Attitude to Risk Score

Question	А	В	С	D	E	Score
7	0	4	7	10	14	
8	0	4	7	10	14	
9	0	4	7	10	14	
10	15	10	5	0	-	
11	0	4	7	10	14	
12	0	5	10	15	-	
13	0	4	7	10	14	
Total						

An investor with a time horizon score of less than 2 years may not be able to bear the risk associated with any of the investment options. The adviser may recommend a zero risk investment to the investor.

Time Frame Scores

Attitude to Risk Score	0-5	6-9	10-14	15-19	20-40
0-15	Not Suitable	Defensive	Defensive	Defensive	Defensive
16-35	Not Suitable	Defensive	Conservative	Conservative	Conservative
35-55	Not Suitable	Defensive	Balanced	Balanced	Balanced
56-85	Not Suitable	Defensive	Balanced	Adventurous	Adventurous
86-100	Not Suitable	Defensive	Balanced	Adventurous	Aggressive

Sustainable Scoring

To calculate the sustainable score of the investor their answers from the Sustainability Views will need to be factored together.

Question 1 is not scored. This is intended to allow advisers to record the investor's existing understanding of sustainability and green investment within a single document and place the results in context.

Sustainability Views Score

Question	А	В	С	D	E	Score
2	5	4	3	2	1	
3	5	4	3	2	1	
4	5	4	3	2	1	
5	5	4	3	2	1	
6	5	4	3	2	1	
Total						

Sustainability Views Scoring Totals

A score of 20 or more

This would suggest full client embracement in sustainable investing and this is an integral part of their investment philosophy.

A score of between 10-19

This would suggest they are interested in having a proportion of the portfolio exposed to sustainable investing, but this is not the core objective.

A score of 9 or less

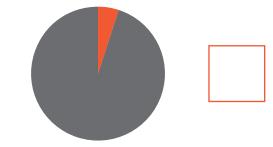

This would suggest they are not interested in sustainable investing.

strategy & planning outcomes

Final Attitude to Risk

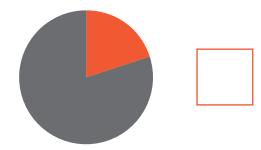

5 Aggressive

Appropriate for investors who have both a high tolerance for risk and a long investment time horizon. The main objective of this portfolio is to provide high growth for the investor's assets. Portfolios in this range may have substantial fluctuations in value from year to year, making this category unsuitable for those who do not have an extended investment horizon.

4 Adventurous

Appropriate for investors with a relatively high tolerance for risk and a longer time horizon. These investors seek above-average growth from their investable assets. The main objective of this risk range is capital appreciation, and its investors should be able to tolerate moderate fluctuations in their portfolio values.

80

3 Balanced

Appropriate for investors who seek relatively stable growth from their investable assets. An investor in the balanced risk range will have a higher tolerance for risk and/or a longer time horizon than either the cautious or defensive investors. The main objective of an individual within this range is to achieve steady portfolio growth while limiting fluctuations to less than those of the overall stock markets.

2 Conservative

Appropriate for the investor who seeks modest capital appreciation from their portfolio. This investor will have either a moderate time horizon or a slightly higher risk tolerance than the most defensive investor. While this range is still designed to preserve the investor's capital, fluctuations in the values of portfolios may occur from year to year.

1 Defensive

Appropriate for the defensive investor, one with a low risk tolerance and/or a short time horizon. It is targeted towards the investor seeking investment stability and liquidity from their investable assets. The main objective of the individual in this risk range is to preserve capital. Fluctuations in the values of portfolios within this range are minor.

Final Sustainability Exposure within your portfolio

We	would describe your approach to sustainability exposure within your po	rtfo	lio as follows:					
	A. It is my primary objective. I would only want to have exposure to those business views and are prepared to accept that this will involve screening out exposure to							
	B. I like the idea of making a positive change and difference with a smaller part of my portfolio. This is not my primary objective but I do like the idea of having some, for example around $\frac{1}{3}$, exposure to sustainable businesses.							
	C. I have no preference towards sustainable investing and as such I do not require of businesses within my portfolio.	e a b	oias towards these kind					
	nal Investment Style and Portfolio Running	Co	ests					
We	would describe your investment style as follows:							
	A. Active Management - I prefer to invest in a larger element of higher cost funds in the hope that they can outperform the market.							
	B. Passive Management - I prefer to invest in a larger element of lower cost funds which track the market rather than trying to outperform it.							
Fi	nal Capacity for Loss							
We	would describe your ability to absorb capital losses and fluctuations in your port	folio	value as follows:					
	A. You are unable to absorb any losses to your portfolio value as it would have a set detrimental impact to your standard of living.	igni	ficant					
	B. You could incur small losses. In extreme circumstances a drop of 20% or less in portfolio would not have a material impact on your standard of living.	the	value of your					
	C. You can incur some loss. Falls of up to 35% of or less in the value of your portfol a significant impact on your standard of living.	olio v	would not have					
	D. It appears that you are able to absorb large losses (above 35%) in the value of without it significantly impacting your standard of living.	your	portfolio
